**REVISED NOTICE OF PROPOSED AWARD****Local Government Challenge
Grant Solicitation GFO-16-404
April 1120, 2017**

The purpose of this revised Notice of Proposed Awards is to include two proposals that were not included in the Notice of Proposed Awards released on April 11, 2017.

On January 6, 2017, the California Energy Commission (Energy Commission) released a competitive solicitation to fund projects that stimulate innovation in building energy efficiency and developing or implementing climate action plans. Up to \$10.2 million in American Recovery and Reinvestment Act (ARRA) funding is available to fund applications from local governments in two groups: the Energy Innovation Challenge and the Small Government Leadership Challenge.

The Energy Commission received 38 proposals by the due date of March 27, 2017. Each proposal was screened, reviewed, evaluated and scored using the criteria in the solicitation. Twenty-six proposals passed the Stage One Application Screening.

The attached "Notice of Proposed Awards" identifies each applicant selected and recommended for funding by Energy Commission staff and includes the recommended funding amount and score. The total amount recommended is \$10.2 million.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Energy Commission Business Meeting and execution of a grant agreement. If the Energy Commission is unable to timely negotiate and execute a funding agreement with an Applicant, the Energy Commission, at its sole discretion, reserves the right to cancel or otherwise modify the pending award, and award the funds to another applicant.

In addition, the Energy Commission reserves the right to: 1) add to, remove, or shift funding between the different groups if there are insufficient passing proposals in one group and 2) negotiate with successful applicants to modify the project scope, schedule, and/or level of funding.

This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission's website at:

www.energy.ca.gov/contracts/.

Questions should be directed to:
